

Project Design Phase
Problem – Solution Fit

Date	10 September 2026
Team ID/SID	SWUID2026136950
Project Name	Automated Network Request Management in ServiceNow
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why.

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ Understand the existing situation in order to improve it for your target group.

Problem-Solution Fit — 10 Sections

Define Customer & Market 1. CUSTOMER SEGMENT(S) CS Network Engineers, IT Operations staff, and employees who submit network access or configuration requests in a large enterprise. Secondary segment: IT Managers who oversee network operations and compliance.	5. CUSTOMER CONSTRAINTS CC Limited IT budget, no dedicated development team, existing ServiceNow license, compliance requirements, approval hierarchy, and limited time for training.	9. AVAILABLE SOLUTIONS AS Email-based requests, shared spreadsheets, third-party ticketing tools, manual approval chains, and other ITSM tools like Jira Service Management. None of them provide end-to-end automation with ServiceNow's native capabilities. Explore & Differentiate
Focus on JTBD, Root Cause 2. JOBS-TO-BE-DONE / PROBLEMS JTBD Submit network requests quickly, get approvals without chasing people, track request status in real time, and complete network changes with full audit trail. The job is to keep the network secure and available while responding to user needs fast.	6. PROBLEM ROOT CAUSE RC No standard system for capturing requests, no automated approval workflow, no centralized tracking, and everything depends on manual effort and personal follow-up.	7. BEHAVIOUR BE Users send emails, chat messages, and phone calls. Approvers reply over email with no tracking. Engineers manually create tasks and keep personal spreadsheets for tracking. Focus on Users, their needs & behavioural patterns
Map Triggers & Emotions 3. TRIGGERS TR An employee needs network access for a new project. A firewall rule needs to be changed for a new application. A device configuration needs updating. An audit is coming up. A request is stuck in email. 4. EMOTIONS: BEFORE / AFTER EM Before: Frustrated, overwhelmed, unsure if the request will be processed. After: Relieved, confident, in control, with full visibility into the status.	10. YOUR SOLUTION SL An automated Network Request Management system built on ServiceNow. It provides a standard Service Catalog item with dynamic UI Policies, an end-to-end Flow Designer approval workflow, auto-creation of fulfillment tasks, auto-closure of requests, and four email notifications covering the full lifecycle. The solution eliminates manual coordination, provides full audit trails, and gives requesters real-time visibility.	8. CHANNELS OF BEHAVIOUR CH 8.1 ONLINE Email, Service Portal, chat (Teams/Slack), knowledge base, and internal ticketing system. 8.2 OFFLINE Phone calls, in-person requests, and printed forms. Reach users through the right channels
